→

A. As being the government of India, to help our farmers from the flood problems, Government has announced the project of 'Panchanama'. In order to reach the position of great government servers, they required the information of all farmers of particular states of India briefly.

B. • Research has shown that....

• To take the information of farmers they are filling offline forms.

• We have to make a website to take all the so that it can be easy for servants to take all data in online medium. The capacity of website should be large.

• We can take a look on geographical areas every farm easily using maps.

• We can make a online forms in easy manner so that every farmer can use it at home at any time.

C. Project Scope:-

• The goal of this project is to help farmer from this disaster like flooding situation.

• For that we have to make a large, safe but portable website.

• For this we can think to make website which can be use on mobile without going in 'Setu' center.

• It will require 5000 for 1 month (per 2 weeks)

• In two months, the project should be completed.
